

Relieve pain and heal wounds faster in animals with Photizo Vetcare

Photizo Vetcare is a battery operated light therapy device that harnesses the healing power of red and infrared light at specific wavelengths and frequencies for accelerated healing by activating the pain and relaxing 'medication' of the animal's own body. It is designed to treat domestic animals, large livestock and horses.

Photizo Vetcare relieves pain, stimulates cells to repair and heal, reduces swelling and inflammation, and stimulates the immune system in acute traumatic conditions. It is especially effective in treating conditions associated with arthritic conditions and overuse injuries in animals.

Chronic 'injuries' or overuse inflammatory reactions occur when the tissue does not complete the healing cycle. Photizo Vetcare breaks the cycle of chronic 'injuries' or overuse inflammatory reactions, giving the tissue the opportunity to start the healing process if possible, or in chronic conditions to maintain pain-free periods.

Treatment stimulates optimum cell condition (bone, nerve, capsule, cartilage and muscle tissue), helping to prevent further degeneration of tissues like nerves, bone/joints and blood vessels.

Treatment on the acupuncture points has also achieved excellent outcomes. Photizo Vetcare allows increased blood flow into the area being treated to ensure that any waste is quickly removed from the area.

The LEDs (light emitting diodes) in the Photizo Vetcare are non-invasive and painless, producing a gentle and soothing warmth and they do not require recovery time.

Photizo Vetcare is perfect for treating the following:

- Skin conditions: wounds, lacerations, abscesses, skin allergies, eczema, etc.
- Musculoskeletal problems such as arthritis, tendonitis, overuse injuries and muscle spasms
- Post-op: any area treated surgically, including skin grafts
- Corneal ulcers, viral-related conditions and sinusitis.

The success of the Photizo Vetcare is illustrated by the following testimonials:

1. “This has been a great tool both for us and the furry patients I work with as a canine massage therapist. The best part is while some light therapy devices require several minutes per treatment area this one just takes a minute so I can easily work various areas and not have issues with patients wanting to move.” – Suzanne O’Brien.
2. “We purchased this to help our dog that is suffering from muscular / joint problems. Before I purchased this it was costing me a small fortune for each vet visit for them to apply similar treatment, and most of the time my dog could not settle comfortably at the vet during the treatment, so after extensive research we bought a Photizo Vetcare. It has made a great difference to our dog, I believe it has helped in prolonging his ability to be mobile and the treatment is applied in the comfort of our home.” – Amazon customer
3. “The Photizo I used on my English Bull Terrier did wonders for his skin rash. He has a bad medical condition where the skin on his belly and under his legs would flare up and itch uncontrollably. After using the Photizo Vetcare I saw an immediate difference. After just a few days the rash had completely cleared up and hasn’t returned. It was the only thing that really helped, and I can tell you I tried everything.” – Roleen Scheepers.
